

Power Pages Skills Index

Read each delivery-system boundary horizontally from planning through deployment and operations.

Rows = product surfaces · Columns = Power Pages delivery stages: PLAN → BUILD / INTEGRATE → SECURE → VALIDATE / REVIEW → DEPLOY / OPERATE

A skill's **Purpose** badge is its *global lifecycle intent* (Build · Author · Review · Deploy · Operate · Govern · Migrate) and may differ from the delivery column it sits in.

Delivery boundary	PLAN	BUILD / INTEGRATE	SECURE	VALIDATE / REVIEW	DEPLOY / OPERATE
Site Experience Frontend, backend, runtime, and release	Create Site ↗ Create a modern Power Pages code site. Power Platform Skills BUILD Skill	Integrate Backend ↗ Choose Web API, server logic, cloud flow, or a combination. Power Platform Skills BUILD Skill Add Cloud Flow ↗ Connect notifications or asynchronous processes. Power Platform Skills BUILD Skill	manage-headers / firewall ↗ Strengthen browser and network controls. Power Platform Skills GOVERN Skill	Test Site ↗ Crawl pages in a real browser and inspect console/network failures. Power Platform Skills REVIEW Skill Scan Code ↗ Inspect frontend code for issues before release. Power Platform Skills REVIEW Skill HAR-assisted analysis ↗ Map network bottlenecks to site code and components. Power CAT Skills REVIEW Skill	Deploy Site ↗ Build and upload a Power Pages code site. Power Platform Skills DEPLOY Skill Diagnose Deployment ↗ Interpret deployment failures and remediation. Power Platform Skills OPERATE Skill
	Setup Datamodel ↗ Design Dataverse tables and relationships. Power Platform Skills BUILD Skill	Integrate WebAPI ↗ Create typed clients, services, permissions, and settings. Power Platform Skills BUILD Skill	Audit Permissions ↗ Review table permissions and scopes. Power Platform Skills REVIEW Skill Migrate WebAPI SelectAll ↗ Replace deprecated Web API wildcard fields with least-privilege explicit columns. Power Platform Skills REVIEW Skill		Setup Solution ↗ Create the solution and deployment boundary. Power Platform Skills DEPLOY Skill
			Setup Auth ↗ Configure authentication and identity providers. Power Platform Skills GOVERN Skill Create WebRoles ↗ Create roles and access mapping. Power Platform Skills GOVERN Skill	Security Review ↗ Run a security-focused site assessment. Power Platform Skills REVIEW Skill	
Identity & Access Authentication and authorization boundaries					
Quality & ALM Architecture, pipelines, and independent assurance	Plan ALM ↗ Choose solution boundaries, pipelines, and deployment topology. Power Platform Skills GOVERN Skill			PowerCAT OverPage ↗ Six-pillar review: security, performance, accessibility, maintainability, architecture, and reliability. Power CAT Skills REVIEW Skill	Setup Pipeline ↗ Configure Power Platform pipelines. Power Platform Skills DEPLOY Skill

Build → Review pairings

Site build	create-site + integrate-backend → PowerCAT OverPage	Security	setup-auth + permissions → audit-permissions + security-review
Release	setup-pipeline + deploy-site → test-site + OverPage		

Daily decision rule

Build the experience and backend together. Validate authentication and table permissions before runtime testing. Run OverPage on the exported solution before customer handoff.

Portability: most pure Agent Skills are broadly installable on compatible hosts. Adapt host-specific tools, paths, plugins, permissions and MCP configuration.
