

CANVAS + MOBILE + CODE + MODEL-DRIVEN

Power Apps Skills Index

Read each app surface horizontally from plan and build through review and release.

Rows = product surfaces · Columns = Power Apps delivery stages: PLAN → BUILD → CONNECT → REVIEW → DEPLOY / EVOLVE

A skill's **Purpose** badge is its *global lifecycle intent* (Build · Author · Review · Deploy · Operate · Govern · Migrate) and may differ from the delivery column it sits in.

24 MCP

5 reference

App surface	PLAN	BUILD	CONNECT	REVIEW	DEPLOY / EVOLVE
Canvas Apps Low-code web and tablet experiences	Canvas App ↗ Plan and coauthor Canvas Apps through the live authoring service. Power Platform Skills MCP	Generate Canvas App ↗ Generate PA YAML screens and controls. Power Platform Skills BUILD Skill	Add Data Source ↗ Discover connectors and live data-source schemas. Power Platform Skills MCP	compile_canvas ↗ Validate Canvas YAML before deployment. Power Platform Skills MCP Analyze Canvas Performance ↗ Audit delegation, performance, and best practices. Power CAT Skills REVIEW Skill	InfoPath To Canvas ↗ Convert InfoPath forms into modern Canvas Apps. Power CAT Skills MIGRATE Skill Migrate To Dataverse ↗ Move SharePoint-backed Canvas Apps toward Dataverse. Power CAT Skills MIGRATE Skill
Mobile Apps Native mobile experiences · Private Preview	Native App Planner ↗ Gate data, native capabilities, connectors, and screens. Power Platform Skills BUILD Skill Design System ↗ Choose a visual direction and generate branded design tokens. Power Platform Skills AUTHOR Skill	Create Mobile App ↗ Generate Expo/React Native screens in parallel. Power Platform Skills BUILD Skill	add-connector · Mobile ↗ Add Power Platform connectors and generated services. Power Platform Skills BUILD Skill	Preview Screens ↗ Review generated screens without running Metro. Power Platform Skills REVIEW Skill Debug App ↗ Check routes, payloads, contrast, icons, and runtime issues. Power Platform Skills REVIEW Skill	deploy + Wrap ↗ Build, push, and prepare distribution through Power Apps Wrap. Power Platform Skills DEPLOY Skill Edit App ↗ Apply safe plan deltas; add offline scope when required. Power Platform Skills BUILD Skill Check Updates ↗ Check the plugin, native host, Microsoft packages, and direct npm dependencies with per-package approval and rollback. Power Platform Skills OPERATE Skill Telemetry ↗ Enable, disable, or check the mobile-app plugin's usage-data telemetry. Power Platform Skills OPERATE Skill Set Up Application Insights ↗ Configure optional observability for a Power Apps mobile app using an existing, customer-owned Application Insights resource. Off by default; no resource creation. Power Platform Skills OPERATE Skill
Power Apps Mobile Extension Third-party native controls for the Power Apps Wrap runtime	Design Native Extension Feature ↗ Create and approve the product requirements and cross-platform technical design. Power Apps Mobile Extension AUTHOR Skill	Generate Native Extension ↗ Generate the Android and iOS native sources plus their manifest dispatch contract. Power Apps Mobile Extension BUILD Skill Generate PPMPlugin Manifest ↗ Validate, reconcile, and stage the .ppmplugin manifest for the selected platforms. Power Apps Mobile Extension BUILD Skill Build Android Binary ↗ Compile the Android Kotlin module into a runtime-loadable DEX. Power Apps Mobile Extension BUILD Skill Build iOS Binary ↗ Compile the iOS module into the flat device-slice framework required by Wrap. Power Apps Mobile Extension BUILD Skill Generate PPMPlugin ↗ Build and verify the native .ppmplugin bundle end to end. Power Apps Mobile Extension BUILD Skill	Generate PCF Companion ↗ Generate the dispatcher PCF that connects Canvas Apps to the native module. Power Apps Mobile Extension BUILD Skill	Test Native Extension ↗ Run structural, manifest, contract, and PCF validation before native builds. Power Apps Mobile Extension REVIEW Skill Audit PPMPlugin ↗ Statically audit a built bundle and route findings to the owning stage. Power Apps Mobile Extension REVIEW Skill Debug Extension ↗ Diagnose failures and apply approved fixes across native, manifest, and PCF contracts. Power Apps Mobile Extension REVIEW Skill	Assemble PPMPlugin ↗ Reconcile staged binaries, assemble the final bundle, and verify its archive layout. Power Apps Mobile Extension DEPLOY Skill Publish PCF Companion ↗ Build and publish the dispatcher PCF to the selected Power Platform environment. Power Apps Mobile Extension DEPLOY Skill
Code Apps Custom React and Vite web experiences	Design Guide ↗ Establish brand tokens before generating a Code App. Power CAT Skills AUTHOR Skill	Create Code App ↗ Scaffold React/Vite apps with connector-first data access. Power Platform Skills BUILD Skill	Add Datasource ↗ Connect Dataverse, SharePoint, Teams, Excel, or other services. Power Platform Skills BUILD Skill	Eval Generator Code App ↗ Generate feature, unit, and security evals plus dashboard. Power CAT Skills REVIEW Skill	deploy · Apps ↗ Push Code Apps or Mobile Apps through product tooling. Power Platform Skills DEPLOY Skill
Model-driven Apps Data-rich apps and generative pages	Genpage ↗ Plan a model-driven generative page and its Dataverse shape. Power Platform Skills BUILD Skill	App Builder ↗ Build or edit a complete model-driven app from a reviewable App Spec. Power Platform Skills BUILD Skill Genpage ↗ Plan a model-driven generative page and its Dataverse shape. Power Platform Skills BUILD Skill	Dv Metadata ↗ Design tables, columns, relationships, forms, and views. Dataverse Skills BUILD Skill	Eval Generator Gen Pages ↗ Generate presence, unit, and security checks. Power CAT Skills REVIEW Skill	pac model genpage upload ↗ Upload the generated page to its target app. Power Platform Skills DEPLOY Skill

Build → Review pairings

Canvas	canvas-app / generate-canvas-app	→	analyze-canvas-performance	Mobile	design-system / create-mobile-app	→	preview-screens + debug-app
Code	create-code-app	→	eval-generator-code-app	Model-driven	app-builder / genpage	→	eval-generator-gen-pages

Daily decision rule

Choose the app surface first, then follow its row left to right. Canvas = low-code. Mobile = native device experience. Code = custom web UX. Model-driven = data-rich internal experience. Never release without the review cell in the same row.

Portability: most pure Agent Skills are broadly installable on compatible hosts. Adapt host-specific tools, paths, plugins, permissions and MCP configuration.
