LEGACY EXPERIENCE -> GOVERNED MODERN PLATFORM

Modernization & Migration Skills Index

Read each legacy boundary horizontally through assessment, transformation, validation, and adoption.

Rows = product surfaces · Columns = Modernization delivery stages: ASSESS → PLAN → TRANSFORM → MIGRATE DATA → VALIDATE → ADOPT / OPERATE

A skill's **Purpose** badge is its *global lifecycle intent* (Build · Author · Review · Deploy · Operate · Govern · Migrate) and may differ from the delivery column it sits in.

Build → Review pairings

InfoPath	infopath-to-canvas	→ Canvas performance review	SharePoint data	migrate-to-dataverse	→ dv-security + data validation
Classic agent	Copilot Studio /migrate	→ approved plan + live chat test	Power Pages Bootstrap	migrate-bootstrap	→ test-site + OverPage

Daily decision rule

Never combine all migrations into one opaque task. Baseline, approve the target, migrate by boundary, validate independently, then capture the new operating model.

Portability: most pure Agent Skills are broadly installable on compatible hosts. Adapt host-specific tools, paths, plugins, permissions and MCP configuration.
