CANVAS + MOBILE + CODE + MODEL-DRIVEN

# Power Apps Skills Index

Read each app surface horizontally from plan and build through review and release.

Rows = product surfaces · Columns = Power Apps delivery stages: PLAN → BUILD → CONNECT → REVIEW → DEPLOY / EVOLVE

A skill's **Purpose** badge is its *global lifecycle intent* (Build · Author · Review · Deploy · Operate · Govern · Migrate) and may differ from the delivery column it sits in.

114 skills | 24 MCP | 5 reference

| App surface | PLAN | BUILD | CONNECT | REVIEW | DEPLOY / EVOLVE |
|---|---|---|---|---|---|
| **Canvas Apps**<br>Low-code web and tablet experiences | **Canvas App ↗** MCP<br>Plan and coauthor Canvas Apps through the live authoring service.<br>Power Platform Skills · MCP | **Generate Canvas App ↗** BUILD<br>Generate PA YAML screens and controls.<br>Power Platform Skills · Skill | **Add Data Source ↗** MCP<br>Discover connectors and live data-source schemas.<br>Power Platform Skills · MCP | **compile_canvas ↗** MCP<br>Validate Canvas YAML before deployment.<br>Power Platform Skills · MCP<br>**Analyze Canvas Performance ↗** REVIEW<br>Audit delegation, performance, and best practices.<br>Power CAT Skills · Skill | **InfoPath To Canvas ↗** MIGRATE<br>Convert InfoPath forms into modern Canvas Apps.<br>Power CAT Skills · Skill<br>**Migrate To Dataverse ↗** MIGRATE<br>Move SharePoint-backed Canvas Apps toward Dataverse.<br>Power CAT Skills · Skill |
| **Mobile Apps**<br>Native mobile experiences · Private Preview | **Native App Planner ↗** BUILD<br>Gate data, native capabilities, connectors, and screens.<br>Power Platform Skills · Skill<br>**Design System ↗** AUTHOR<br>Choose a visual direction and generate branded design tokens.<br>Power Platform Skills · Skill | **Create Mobile App ↗** BUILD<br>Generate Expo/React Native screens in parallel.<br>Power Platform Skills · Skill | **add-connector · Mobile ↗** BUILD<br>Add Power Platform connectors and generated services.<br>Power Platform Skills · Skill | **Preview Screens ↗** REVIEW<br>Review generated screens without running Metro.<br>Power Platform Skills · Skill<br>**Debug App ↗** REVIEW<br>Check routes, payloads, contrast, icons, and runtime issues.<br>Power Platform Skills · Skill | **deploy + Wrap ↗** DEPLOY<br>Build, push, and prepare distribution through Power Apps Wrap.<br>Power Platform Skills · Skill<br>**Edit App ↗** BUILD<br>Apply safe plan deltas; add offline scope when required.<br>Power Platform Skills · Skill<br>**Check Updates ↗** OPERATE<br>Check the plugin, native host, Microsoft packages, and direct npm dependencies with per-package approval and rollback.<br>Power Platform Skills · Skill<br>**Telemetry ↗** OPERATE<br>Enable, disable, or check the mobile-app plugin's usage-data telemetry.<br>Power Platform Skills · Skill<br>**Set Up Application Insights ↗** OPERATE<br>Configure optional observability for a Power Apps mobile app using an existing, customer-owned Application Insights resource. Off by default; no resource creation.<br>Power Platform Skills · Skill |
| **Power Apps Mobile Extension**<br>Third-party native controls for the Power Apps Wrap runtime | **Design Native Extension Feature ↗** AUTHOR<br>Create and approve the product requirements and cross-platform technical design.<br>Power Apps Mobile Extension · Skill | **Generate Native Extension ↗** BUILD<br>Generate the Android and iOS native sources plus their manifest dispatch contract.<br>Power Apps Mobile Extension · Skill<br>**Generate PPMPlugin Manifest ↗** BUILD<br>Validate, reconcile, and stage the .ppmplugin manifest for the selected platforms.<br>Power Apps Mobile Extension · Skill<br>**Build Android Binary ↗** BUILD<br>Compile the Android Kotlin module into a runtime-loadable DEX.<br>Power Apps Mobile Extension · Skill<br>**Build iOS Binary ↗** BUILD<br>Compile the iOS module into the flat device-slice framework required by Wrap.<br>Power Apps Mobile Extension · Skill<br>**Generate PPMPlugin ↗** BUILD<br>Build and verify the native .ppmplugin bundle end to end.<br>Power Apps Mobile Extension · Skill | **Generate PCF Companion ↗** BUILD<br>Generate the dispatcher PCF that connects Canvas Apps to the native module.<br>Power Apps Mobile Extension · Skill | **Test Native Extension ↗** REVIEW<br>Run structural, manifest, contract, and PCF validation before native builds.<br>Power Apps Mobile Extension · Skill<br>**Audit PPMPlugin ↗** REVIEW<br>Statically audit a built bundle and route findings to the owning stage.<br>Power Apps Mobile Extension · Skill<br>**Debug Extension ↗** REVIEW<br>Diagnose failures and apply approved fixes across native, manifest, and PCF contracts.<br>Power Apps Mobile Extension · Skill | **Assemble PPMPlugin ↗** DEPLOY<br>Reconcile staged binaries, assemble the final bundle, and verify its archive layout.<br>Power Apps Mobile Extension · Skill<br>**Publish PCF Companion ↗** DEPLOY<br>Build and publish the dispatcher PCF to the selected Power Platform environment.<br>Power Apps Mobile Extension · Skill<br>**Telemetry · Mobile Extension ↗** OPERATE<br>Enable, disable, or check usage telemetry transmission for the Power Apps Mobile Extension plugin.<br>Power Platform Skills · Skill |
| **Code Apps**<br>Custom React and Vite web experiences | **Design Guide ↗** AUTHOR<br>Establish brand tokens before generating a Code App.<br>Power CAT Skills · Skill | **Create Code App ↗** BUILD<br>Scaffold React/Vite apps with connector-first data access.<br>Power Platform Skills · Skill | **Add Datasource ↗** BUILD<br>Connect Dataverse, SharePoint, Teams, Excel, or other services.<br>Power Platform Skills · Skill | **Eval Generator Code App ↗** REVIEW<br>Generate feature, unit, and security evals plus dashboard.<br>Power CAT Skills · Skill | **deploy · Apps ↗** DEPLOY<br>Push Code Apps or Mobile Apps through product tooling.<br>Power Platform Skills · Skill |
| **Model-driven Apps**<br>Data-rich apps and generative pages | **Genpage ↗** BUILD<br>Plan a model-driven generative page and its Dataverse shape.<br>Power Platform Skills · Skill | **App Builder ↗** BUILD<br>Build or edit a complete model-driven app from a reviewable App Spec.<br>Power Platform Skills · Skill<br>**Genpage ↗** BUILD<br>Plan a model-driven generative page and its Dataverse shape.<br>Power Platform Skills · Skill | **Dv Metadata ↗** BUILD<br>Design tables, columns, relationships, forms, and views.<br>Dataverse Skills · Skill | **Eval Generator Gen Pages ↗** REVIEW<br>Generate presence, unit, and security checks.<br>Power CAT Skills · Skill | **genpage-upload.js ↗** DEPLOY<br>Upload the generated page to its target app through the bundled SDK.<br>Power Platform Skills · Skill |
| **PCF Code Components**<br>Reusable field and dataset controls · Preview | **PCF Code Components ↗** BUILD<br>Build, test, deploy and verify Power Apps component framework (PCF) code components from Microsoft templates.<br>Power Platform Skills · Skill | **PCF Code Components ↗** BUILD<br>Build, test, deploy and verify Power Apps component framework (PCF) code components from Microsoft templates.<br>Power Platform Skills · Skill | — | **PCF Code Components ↗** BUILD<br>Build, test, deploy and verify Power Apps component framework (PCF) code components from Microsoft templates.<br>Power Platform Skills · Skill | **PCF Code Components ↗** BUILD<br>Build, test, deploy and verify Power Apps component framework (PCF) code components from Microsoft templates.<br>Power Platform Skills · Skill<br>**Report Issue · PCF ↗** OPERATE<br>File a bug report for the PCF plugin in its GitHub repository.<br>Power Platform Skills · Skill<br>**Telemetry · PCF ↗** OPERATE<br>Enable, disable, or check the PCF plugin's usage-data telemetry.<br>Power Platform Skills · Skill |

## Build → Review pairings

| | | | | | |
|---|---|---|---|---|---|
| Canvas | canvas-app / generate-canvas-app | → analyze-canvas-performance | Mobile | design-system / create-mobile-app | → preview-screens + debug-app |
| Code | create-code-app | → eval-generator-code-app | Model-driven | app-builder / genpage | → eval-generator-gen-pages |

## Daily decision rule

**Choose the app surface first, then follow its row left to right. Canvas = low-code. Mobile = native device experience. Code = custom web UX. Model-driven = data-rich internal experience. Never release without the review cell in the same row.**

Portability: most pure Agent Skills are broadly installable on compatible hosts. Adapt host-specific tools, paths, plugins, permissions and MCP configuration.
