# Power Pages Skills Index

Read each delivery-system boundary horizontally from planning through deployment and operations.

Rows = product surfaces · Columns = Power Pages delivery stages: PLAN → BUILD / INTEGRATE → SECURE → VALIDATE / REVIEW → DEPLOY / OPERATE

A skill's **Purpose** badge is its *global lifecycle intent* (Build · Author · Review · Deploy · Operate · Govern · Migrate) and may differ from the delivery column it sits in.

## Daily decision rule

**Build the experience and backend together. Validate authentication and table permissions before runtime testing. Run OverPage on the exported solution before customer handoff.**

Portability: most pure Agent Skills are broadly installable on compatible hosts. Adapt host-specific tools, paths, plugins, permissions and MCP configuration.
