

Modernization & Migration Skills Index

Read each legacy boundary horizontally through assessment, transformation, validation, and adoption.

📄 Rows = product surfaces · Columns = Modernization delivery stages: ASSESS → PLAN → TRANSFORM → MIGRATE DATA → VALIDATE → ADOPT / OPERATE

🔑 A skill's **Purpose** badge is its *global lifecycle intent* (Build · Author · Review · Deploy · Operate · Govern · Migrate) and may differ from the delivery column it sits in.

Delivery boundary	ASSESS	PLAN	TRANSFORM	MIGRATE DATA	VALIDATE	ADOPT / OPERATE
InfoPath / Canvas Legacy forms and app experience	Analyze Canvas Performance ↗ Audit delegation, performance, and best practices. Power CAT Skills	InfoPath To Canvas ↗ Convert InfoPath forms into modern Canvas Apps. Power CAT Skills	Canvas App ↗ Plan and coauthor Canvas Apps through the live authoring service. Power Platform Skills	—	Canvas performance ↗ Delegation and performance audit. Power CAT Skills	Power CAT Storytelling ↗ Turn outcomes into a customer-ready story. Power CAT Skills
SharePoint / Dataverse Data source and target platform	—	Migrate To Dataverse ↗ Move SharePoint-backed Canvas Apps toward Dataverse. Power CAT Skills	Dv Metadata ↗ Design tables, columns, relationships, forms, and views. Dataverse Skills	Dv Data ↗ CRUD, CSV import, multi-table loads, upsert, and sample data. Dataverse Skills	Dv Security ↗ Roles, users, application users, business units, and access. Dataverse Skills	Admin Digest ↗ Prioritize Message Center, health, issues, and deprecations. Power CAT Skills
			Airtable To Power Platform ↗ Assess, transform, and migrate Airtable schema and data to Dataverse or SharePoint, with optional app generation. Power CAT Skills	Add Sample Data ↗ Generate contextual sample records for app development. Power Platform Skills		
				PowerCAT Access Migration ↗ Migrate an Access .mdb or .accdb database to Dataverse, with an optional model-driven app and approval before writes. Power CAT Skills		
Classic Agents Capability and orchestration migration	Copilot Studio describe ↗ Experimental classic-to-modern Copilot Studio migration: Read-only supporting agent that inventories classic agent behavior, topics, actions, knowledge, and uncertainties. Copilot Studio Plugin	Copilot migration plan ↗ Experimental classic-to-modern Copilot Studio migration: Approve capability and action-migration decisions. Copilot Studio Plugin	mcs-assistant architect ↗ Experimental classic-to-modern Copilot Studio migration: Supporting architect agent that turns an approved behavior description and initialized target into modern orchestration YAML. Agent Skills	—	Copilot Studio chat ↗ Experimental classic-to-modern Copilot Studio migration: Test the published modern agent. Copilot Studio Plugin	Skill Recorder ↗ Desktop app: record a task, review the Copilot analysis, then generate a reusable Agent Skill or Automation. Skill Recorder
Power Pages Existing site baseline and remediation	PowerCAT OverPage ↗ Six-pillar review: security, performance, accessibility, maintainability, architecture, and reliability. Power CAT Skills	—	Migrate Bootstrap ↗ Migrate a traditional Power Pages site from Bootstrap 3 to Bootstrap 5 with a restore point, reviewed residual fixes, upload, and validation. Power Platform Skills	—	Test Site ↗ Crawl pages in a real browser and inspect console/network failures. Power Platform Skills	—

Build → Review pairings

InfoPath	infopath-to-canvas	→	Canvas performance review	SharePoint data	migrate-to-dataverse	→	dv-security + data validation
Classic agent	Copilot Studio /migrate	→	approved plan + live chat test	Power Pages Bootstrap	migrate-bootstrap	→	test-site + OverPage

Daily decision rule

Never combine all migrations into one opaque task. Baseline, approve the target, migrate by boundary, validate independently, then capture the new operating model.

Portability: most pure Agent Skills are broadly installable on compatible hosts. Adapt host-specific tools, paths, plugins, permissions and MCP configuration.
