OPERATE

Skill

A release is ready when every stage — Plan & Secure → Test & Review → Deploy & Operate — has evidence. Purpose badges describe each skill's lifecycle intent.

Build → Review pairings

Change	builder output	→	independent review evidence	Deployment	pipeline/solution promotion	→	smoke test + rollback plan
Operation	monitoring owner	→	incident and change digest				

Daily decision rule

Do not treat 'build succeeded' as 'production ready.' Require evidence for design, access, quality, deployment, rollback, and ownership.

Portability: most pure Agent Skills are broadly installable on compatible hosts. Adapt host-specific tools, paths, plugins, permissions and MCP configuration.
