

PRODUCTION READINESS CONTROL BOARD

Governance, Quality & ALM Skills Index

A release is ready when architecture, access, tests, deployment, and operations all have evidence.

Rows = product surfaces · Columns = Governance & ALM delivery stages: PLAN & SECURE → TEST & REVIEW → DEPLOY & OPERATE

📌 A skill's **Purpose** badge is its *global lifecycle intent* (Build · Author · Review · Deploy · Operate · Govern · Migrate) and may differ from the delivery column it sits in.

Build → Review pairings					
Change	builder output	→	independent review evidence	Deployment	pipeline/solution promotion → smoke test + rollback plan
Operation	monitoring owner	→	incident and change digest		

Daily decision rule

Do not treat 'build succeeded' as 'production ready.' Require evidence for design, access, quality, deployment, rollback, and ownership.

Portability: most pure Agent Skills are broadly installable on compatible hosts. Adapt host-specific tools, paths, plugins, permissions and MCP configuration.
